<b>Abstract</b>			
<p>The oral mask comprises at least a mask body with holes at both sides and slots, and two-two-layer assemblies including internal and external filter layers, which is composed of fixing seat, dust collection cotton and cover and embedded in the slots of mask body. The internal filter has air outlet and the external has air inlet. Air comes from inlet and the dusts are attached to dust collection cotton. Filtered air goes out from outlet. The dust collection cotton may be exchanged at any time.</p>
